

Oracle Autonomous Database : Certification

1Z0-931-21 100% pass

Which three are Oracle-recommended best practices for Autonomous Database alarms?

- Select the correct alarm interval for your metric
- Routinely tune your alarms
- Suppress alarms During Investigations

- Routinely tune your alarms
- Suppress alarms During Investigations

Which set of options can be specified when defining the preferred maintenance schedule of the infrastructure for autonomous dedicated database?

- Month of the Quarter, Week of the month, Day of the Week, Start Hour

Which three options are available to access data in an Autonomous JSON Database

- NoSQL statements using Oracle SODA Drivers
- OCI Console using JSON Online Developer Tool
- REST API calls to the database

Which statement is true about the use of ACL's with ADB on shared

- BUSINESS MODELS

Which Statement is FALSE about Oracle Data Safe?

- It supports only Autonomous Databases.

What happens with standby database when disabling Automous Data Guard?

- Standby database is terminated.

When Cloning from a backup, what is the earliest timestamp on the backup allowed?

- 2 hours

Which option should you use to create a graph with Graph Studio?

- Tables in an Autonomous Database Instance

Which three of the following data sources are available when using Data Load Page on Database actions

- Local Files
- Files in AWS S3 Storage
- Files in Oracle Cloud Storage

You need to setup a notification for a scheduled shutdown of an Automou Database instance?

Which three advanced options can you enable or disable while creating a business model?

- Autonomous Aggregate Cache
- Analytic View Transiency views
- Analytic view base table query transformation

A large, stylized version of the Vizle logo, featuring a large white 'V' on a grey background and a play button icon on a green background, with the word 'Vizle' in white text on a green rectangular background below it.

- Network Security Group

- VCN
- Subnet

Which three methods can be used to migrate your existing Oracle database to Autonomous Database?

- Use Oracle Zero Downtime migration
- Use GoldenGate
- Use Datapump

Which command should you use to enable application continuity in ADB

- Exec `dbms_cloud_admin.enable_app_cont('');`

- Update IORM begin
- Terminate End

In the ADB on Dedicated Infrastructure service, what does the fleet administrator utilize to control OCPU utilization?

- Compartment Quotas

Which two methods can you use to create database users and grant roles in services?

- SQL Plus
- SQL Developer

A customer wants to increase the throughput of their inserts. They have discovered that the bottleneck is in the storage I/Os of their environment.

Which two methods can you use to create database users and grant roles in services?

- SQL Plus
- SQL Developer

A customer wants to increase the throughput of their inserts. They have discovered that the bottleneck is in the storage I/Os of their environment.

What should they do to remove the bottleneck?

- Increase the number of OCPUs allocated to the database.

A large, semi-transparent watermark of the Vizle logo is centered on the page. It features a large white 'V' on a grey background, a play button icon on a green background, and the word 'Vizle' in white on a green background.

You are the admin user of an ADB instance. A new business analyst has joined the team and would like to explore ADB tables using autonomous database data tools.

Which steps need to perform?

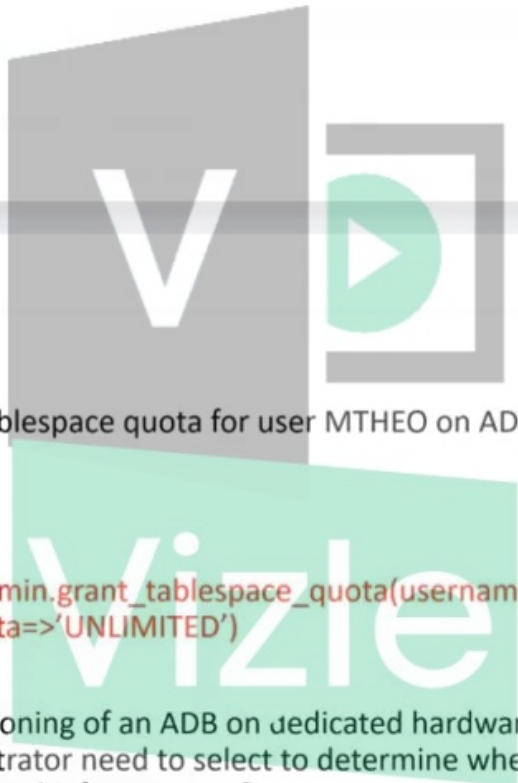

- Create a REST-enabled database user with connect and object privileges and grant DWROLE

While provisioning a dedicated Autonomous Container Database, which backup retention can NOT be implemented?

- 120 days

Which four file formats are supported from loading from cloud storage?

- JSON
- Parquet
- AVRO

How to change tablespace quota for user MTHEO on ADB Shared Infrastructure?

- Execute `dbms_cloud_admin.grant_tablespace_quota(username=>'MTHEO', tablespace_quota=>'UNLIMITED')`

During the provisioning of an ADB on dedicated hardware, what does the database administrator need to select to determine where the ADB is created on dedicated infrastructure?

During the provisioning of an ADB on dedicated hardware, what does the database administrator need to select to determine where the ADB is created on dedicated infrastructure?

- The container database in which the autonomous instance should run

Where are the customer-managed encryption keys are stored for ADB on Dedicated infrastructure?

- In a separate key vault external to the Exadata Infrastructure

Oracle Autonomous Database on Dedicated Infrastructure is composed of which Oracle Cloud resources?

- Autonomous Exadata infrastructure, Autonomous backup, autonomous container database, and autonomous database

- Autonomous Exadata infrastructure, Autonomous backup, autonomous container database, and autonomous database

Which statement is correct with respect to the required action to move ADB resources to a different compartment?

- Autonomous Exadata infrastructure and autonomous container databases have no dependent resources to move with them.

Which two statements are true about Data Insights?

- You can search for Data Insights against a base table or business model
- You can retrieve previously executed Data Insights searches.

Performance Hub. What does it indicate?

- The SQL statement is currently queued

Your customer has upgraded their on-premises 11.2 to 12.2 and during the migration, the database was migrated to a pluggable database and now is in production.

How should the customer unplug their database to migrate to ADB?

- Pluggable databases cannot be migrated to ADB using plug, unplug or clone.

In which four ways can Oracle Database optionally access data in Object Storage?

- Scan avoidance using columnar pruning for .csv files
- Optimized data archive using hybrid partitioned tables
- Scan avoidance using columnar pruning for columnar stores like parquet and orc

Which two of the following statements are correct?

- OCI Web Edition can be installed from OCI Market place.
- The Data Transforms Card provides access to ODI Web Edition.

Which three are use cases for Graph Studio?

- Pattern matching
- Clustering
- Churn analysis

Vizle

A new python developer has joined your team and need to access ADB Data.

How does the developer connect to and interact with ADB from python?

- Using the Oracle client and cx_oracle interace.

What are two differentiators of Oracle .DB on Dedicated Infrastructure?

- It offers greater control and isolation starting at Exadata cloud infrastructure level.
- Users have more control over the maintenance schedule

Which two statements are true about using an Oracle Database with private endpoints?

Which two cloud services are supported to import Data Pump files to ADB on Oracle cloud infrastructure?

- OCI object storage
- OCI object storage classic

Which statement is correct about the service console in an ADB?

- You can use service console to manage runaway SQL statements on ADB

Which method will NOT permit you to change database ADMIN users password of an ADB on Shared Infrastructure?

- OS command line from the database server

Which two actions are available to perform when an autonomous database is stopped?

(Among options given only one answer is valid, and other action is "clone" can be performed)

- Start
- Update License Type
- Update Network access
- Update Administrator password.

concurrent statements per OCPU as well as parallelism?
Which service you need to connect to?

- **TPURGENT**

Data guard is enabled for your ADB and Life cycle state field for the primary database indicates that it is stopped. Which statement is true?

- **The standby database is also stopped.**

Which statement is FALSE about setting up compartment quotas?

- **Compartment quotas cannot be set on the root compartment**

An autonomous database user with an instance wallet has left the company. The user had shared a database user ID with other users when accessing ADB.

Other than changing password, what can an administrator do to protect

- **Compartment quotas cannot be set on the root compartment**

An autonomous database user with an instance wallet has left the company. The user had shared a database user ID with other users when accessing ADB.

Other than changing password, what can an administrator do to protect the instance?

- **Rotate the instance wallet and share the new wallet with remaining users.**

Which statement is FALSE about ADB on Dedicated Infrastructure?

- **Autonomous Exadata infrastructure maintenance runs are for infrastructure patching and include container database patching**

Which stage of the indexing pipeline divides text into tokens.

- LEXER

Which statement is true about connecting marketplace OCI image to ADB on shared infrastructure?

- The marketplace OCI image can be used with an Always Free Autonomous Database account

Which parameter is not required to create a new database using OCI CLI?

- Db type

- The marketplace OCI image can be used with an Always Free Autonomous Database account

Which parameter is not required to create a new database using OCI CLI?

- Db type
