Your project has received

Your project has received CSS offline in the Customer format. What should you do in this case?

Select the correct option(s) and click Submit.

- Upload the same in IPMS
- Collect the CSS again in TCS format using IPMS
- Ignore the feedback since the format is not correct
- Maintain it offline

A risk is defined as

A risk is defined as _____ event or condition that, if it occurs, has a positive or negative effect on one or more project _____.

Select the correct option(s) and click Submit.

- Indefinite, Possibilities
- Uncertain, Objectives
- Sure, Goals

Activate Windows
Go to Settings to activate Windows.

- Sure, Goals
- Definite, Uncertainties

Customer specifies one of

Customer specifies one of the requirements as "The developed system would be able to interact, communicate or exchange information with other system components". This is a _____ and is best known as _____.

Select the correct option(s) and click Submit.

- Non-Functional Requirement, Scalability
- Non-Functional Requirement, Portability
- Functional Requirement, Portability
- Non-Functional Requirement, Interoperability

What is the purpose

What is the purpose of conducting the Project Management Reviews (PMR)?

Select the correct option(s) and click Submit.

- To assess Project Manager's performance
- To rate project as RED, AMBER, GREEN
- To evaluate the current project health and suggest future course of action
- None of the above

Activate Windows

The purpose of a code

The purpose of a code review is the following:

1. Ensure that the code takes care of all requirements specified in the design
2. Ensure that the code complies with the programming standards
3. Ensure that adequate and appropriate comments are given in the code for readability
4. Ensure that consistent naming conventions are followed

Select the correct option(s) and click Submit.

Only 1 and 2

Only 2 and 3

Only 1 and 3

All of these

"Application should be able to handle 1000 concurrent users." This type of non-functional specification is typically written in which of the following?
Select the correct option(s) and click Submit.

- Contract
- Requirement Specification
- Change Request
- None of the above

Vizle

Match the following:

- A. Deliverable 1. Effort
- B. Timelines 2. Defect Free
- C. Budget 3. Scope of work
- D. Quality 4. Schedule

Select the correct option(s) and click Submit.

A-3, B-4, C-1, D-2

A-4, B-3, C-2, D-1

In which of the following

In which of the following situations, while managing a project, you will perform causal analysis?

Select the correct option(s) and click Submit.

- Defects are reported in project deliverables
- Project gets low Customer Satisfaction Index (CSI) rating
- Project fails to meet the timelines for deliverables
- Project consumes more than budgeted efforts
- Project gets CSI above target for the first time

Vizle

You have joined a

You have joined a Testing Project. You want to know what processes should be followed. Where can you find the Testing Process Handbook?

Select the correct option(s) and click Submit.

- KNOWMAX
- QMS Wiki
- Knome
- All of the above

You are about to start a large

enhancement work critical to Customer's business. The Customer has already worked out a detailed plan for this enhancement. However, the Customer wants you to critically review the plan before the work is started. You have thoroughly studied the plan and have found it to be ok. But you still want to have some additional checks done on the plan as it is a highly critical activity. What additional checks will you consider?

Select the correct option(s) and click Submit.

- Use a Statistical Schedule Analyzer model to check on the probability of meeting the overall schedule and to identify any missing critical tasks, unrealistic slack for non critical tasks etc.
- A thorough review based on your experience is enough. No additional checks are required.
- Brainstorm with the team on the functional requirements and understand the complexity. Decide based on the discussion outcome.
- Accept the plan shared by the Customer as is; adjustments can be made during the execution.

A Performance Improvement (PI) project can be initiated by:
Select the correct option(s) and click Submit.

- A Project Manager only
- A Group Leader Only
- Delivery Excellence Group Only
- Performance Improvement Champion Only
- Any associate in TCS

deployment of this change, the Customer asks you to predict the risk of application failure on introducing this change. The characteristics of the change such as technology, complexity, functional area, competency of developers working on the change, and so on, are known. You also have good amount of past data of such changes introduced. Which prediction model would you employ to predict the risk of introducing this change?

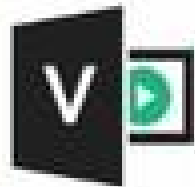

Select the correct option(s) and click Submit.

- CSI Prediction Model
- Bayesian Classifier Model
- MUSA Incident Arrival Rate Prediction Model
- None of the above
