Select "At my home or office"

Click "Run pre-check"

Microsoft

Select exam options

MS-900: Microsoft 365 Fundamentals

All fields are required.

How do you want to take your exam? [Exam delivery option descriptions](#)

- At a local test center
- At my home or office
- At a Certiport test center
- I have a Private Access Code

Are you going to be testing on this device and network?
If so, perform a quick pre-check to verify compatibility of your device and network before planning to take this exam in your home or office.
If you skip, be sure to do a full system test before test day to avoid lost exam fees and launch delays.

Run pre-check

Next

On-premises computing costs	Cloud computing costs
Server costs	Leasing a cloud-based server
Storage costs	Leasing software and customized features
Network costs	Scaled charges based on usage/demand instead of fixed hardware or capacity
Backup and archive costs	Billing at the user or organization level
Business continuity and disaster recovery costs	
Datacenter infrastructure costs	
Technical personnel

What is Microsoft Azure?

Microsoft Azure is a cloud-computing platform used for building, deploying, and managing applications and services through a global network of Microsoft-managed datacenters

Azure contains more than 100 services, including:

- Azure Active Directory (Azure AD or AAD)
- Azure Information Protection
- Backup
- Content Delivery Network
- Key Vault
- Machine Learning
- Media Services
- Mobile Services
- Multi-Factor Authentication
- Stream Analytics
- Virtual Machines
- Virtual Network

The cloud-only model

SaaS, PaaS, or IaaS:

- is strictly run in the cloud

Advantages:

- No infrastructure requirements
- No CapEx

You want a cloud subscription model that is the least expensive way to access services that are strictly hosted by a cloud service provider. Which cloud model describes this?

- (A) Public cloud }
- (B) Private cloud ✗
- (C) Hybrid cloud .
- (D) Cumulonimbus cloud
