V  Normal or standard type of diode

Used in RF (radio frequency) or other low current applications

Zener Diode:

Used to provide a stable reference voltage

Works under reverse bias condition
and found that when a particular voltage
is reached it breaks down

Used to off

vizle

V  Diode has a lower forward voltage drop than ordinary silicon PN junction diodes

Gunn Diode:

Used for producing microwave signals

Vizle

Used to detect light-photodiodes operate under reverse bias condition

V

PI

vizle

Learn about Basic Components, Transformers, Motors, Sensors modules
All Ic's and much more...
